**PATENT**  
Attorney Docket No. INK-039  
(2108/36)

**IN THE UNITED STATES PATENT AND TRADEMARK OFFICE**

APPLICANTS: Drzaic et al.  
SERIAL NO.: 09/289,507 GROUP NO.: 2673  
FILING DATE: April 9, 1999 EXAMINER: J. H. Nguyen  
TITLE: Full Color Reflective Display with Multichromatic Sub-Pixels

Assistant Commissioner for Patents  
Washington, D.C. 20231

**RECEIVED**

APR 11 2002

**INTERVIEW SUMMARY RESPONSE**

Technology Center 2600

Sir:

Applicants wish to thank the Examiner for his helpful suggestions, recommendations, and time during the telephonic interview on February 27, 2002. In response to the interview summary ("interview summary") mailed on February 28, 2002, Applicants respectfully submit the following remarks. Applicants believe that no fees are due at this time in conjunction with this response, however, if any fees are due, the Director is hereby authorized to charge any such fees to Deposit Account No. 20-0531.

**REMARKS**

The Interview Summary states that,

Applicants' representative and Examiner agreed a distinct feature between the cited reference, Jacobson et al., and the invention of the pending application, i.e., the invention of the pending application teaches that in a full RGB color display, the display element presents a white visual display by white particles, and while Jacobson et al. discloses that the display element presents a white visual display by a process of individual three red, green and blue microcapsules (see Jacobson et al., column 12, lines 5-11). However, none of the pending claims recites a full RGB color display apparatus having a plurality of pixels, wherein each pixel comprises three microcapsules, a first microcapsule including a plurality of white particles and a plurality of red particles, a second microcapsule including a plurality of white particles and a plurality of green particles, and a third microcapsule including a plurality of white particles and a plurality of blue particles, and wherein the white visual pixel is provided by at least by white particles, so as the claimed invention is distinct from Jacobson et al..

To the extent that the interview summary may be read to infer that Applicants' representative stated that Jacobson et al. "discloses that the display element presents a white visual display by a process of individual three red, green and blue microcapsules," Applicants' representative wishes to clarify his and Applicants' view of Jacobson. Specifically, Applicants' and Applicants' representative's view is that Jacobson et al. discloses, inter alia, a full color display wherein white is provided by a process white by, e.g., combining individual three red, green and blue particles. In contrast, Applicant's present application discloses a full color display wherein white is provided by white particles.

Respectfully submitted,

Date: March 28, 2002
